**Note:** Kerbweights are minimum vehicle kerbweight according to European Type Approval and include all fluids, tools and a 90% fuel load. They will vary according to the vehicle specification (including options and accessories) with a corresponding variation in payload. Kerbweights are also subject to manufacturing tolerances. Payload figures do not allow for the weight of the driver, or any passengers, which should therefore be deducted from the figures shown. UK Specification adds radio and deadlocks to base vehicle reducing payload by 10kg. Sportive specification adds a further 45kg to Sportive L1 Panel Van, 30kg to Sportive L2 Panel Van with a corresponding decrease in payload. Gross plated weights (including axle weights) quoted on the vehicle plate are to UK plated weight specification and must never be exceeded. Roof load should not exceed 100kg on H1 models including the weight of the roof rack/carrier.

**Note:** Kerbweights are minimum vehicle kerbweight according to European Type Approval and include all fluids, tools and a 90% fuel load. They will vary according to the vehicle specification (including options and accessories) with a corresponding variation in payload. Kerbweights are also subject to manufacturing tolerances. Payload figures do not allow for the weight of the driver, or any passengers, which should therefore be deducted from the figures shown. UK Specification adds radio and deadlocks to base vehicle reducing payload by 10kg. Sportive specification adds a further 45kg to Sportive L1 Panel Van, 30kg to Sportive L2 Panel Van and 20kg to Sportive Crew Van with a corresponding decrease in payload. Glazed Crew Van adds a further 40kg to Crew Van with a corresponding decrease in payload. Gross plated weights (including axle weights) quoted on the vehicle plate are to UK plated weight specification and must never be exceeded. Roof load should not exceed 100kg on H1 models including the weight of the roof rack/carrier. H2 models are not permitted to carry roof loads.
